

## Description

# A MOUNTING SYSTEM REEVED TO MOVE AN OBJECT IN TWO-DIMENSIONS AND METHODS RELATING TO SAME

### BACKGROUND OF INVENTION

[0001] This application is a continuation in part of United States Patent Application 10/605,778, filed 10/25/2003 entitled "System and Method for Moving Objects within Two-Dimensional Space" the specification of which is hereby incorporated herein by reference.

### [0002] FIELD OF THE INVENTION

[0003] Embodiments of the invention described herein pertain to the field of aerial cable rail systems. More particularly, these embodiments enable the movement of objects within two-dimensional space.

### [0004] DESCRIPTION OF THE RELATED ART

[0005] An aerial cable rail system is a system based on an elevated cable or line, along which objects are transported.
